AN UNYIELDING STRUCTURE

Establishing and maintaining a perpendicular angle to the floor is the most important aspect of portable screens. A lack in this aspect will distort projected images, and putting risk to the stability and durability of the screen.

EXZEN Portable Screen is flawless in its structural design. It is built through an advanced manufacturing process, creating a perfect 90 degree angle Portable Screen with zero distortions.

PEERLESS DURABILITY

The product case is exclusively designed to prevent any possible distortions, and the X-frame is unduly sturdy and is able to support new Portable Screens, extending the life time and durability of the screen.

SWIFT SET-UP

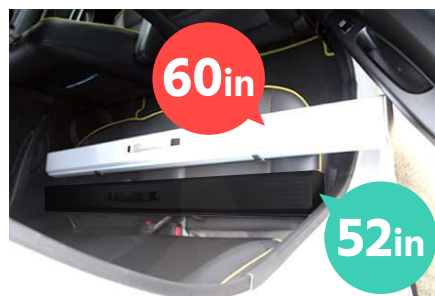

PROTECTIVE PORTABLE BAG

The Protective Bag is layered with a sponge inside to protect the Portable Screen from scratches, and absorb the impacts of dropping.

PERFECT FIT

Most portable screens have a length of 60 inch, which are unable to fit into light vehicles nor the car boot.

However, EXZEN has provided a special length of 52 inch to make what supposed to be a portable screen, a truly portable screen.
